UNICLED HELMET OMEGA 5.0 makes a difference by combining **650nm Red LED Light** with **850nm Near Infrared (NIR) Light**, a wavelength that penetrates deeper than lasers to improve the follicle environment and reduce inflammation. Thanks to its **advanced LLLT technology**, clinically studied for supporting hair growth, and a **powerful irradiance of 5.5 mW/cm²**, this helmet ensures constant, safe, and uniform energy delivery across the entire scalp, not only stimulating growth but also improving hair health from the root. **It is the most complete combination on the market for those seeking clinical results with the deepest treatment available.**
